

SYSTEMS AND AUTOMATION DIVISION

SYSTEMS AND AUTOMATION DIVISION

The SYSTEMS AND AUTOMATED DIVISION is a service offered by JOUCOMATIC to assist you with the design of your automated systems including pneumatic, electrical or electronic installations

SYSTEMS AND AUTOMATION DIVISION

A LONG-STANDING EXPERIENCE

With the SYSTEMS AND AUTOMATION DIVISION, your installation benefits from JOUCOMATIC's 60 years' experience, the know-how of its engineers and technicians. JOUCOMATIC is today one of the world leaders in the fields of fluid circulation and pneumatic components.

SYSTEMS AND AUTOMATION DIVISION

A TEAM OF EXPERTS

Our team of engineers and technicians evaluates your needs. It works out specific solutions to meet your requirements.

SYSTEMS AND AUTOMATION DIVISION

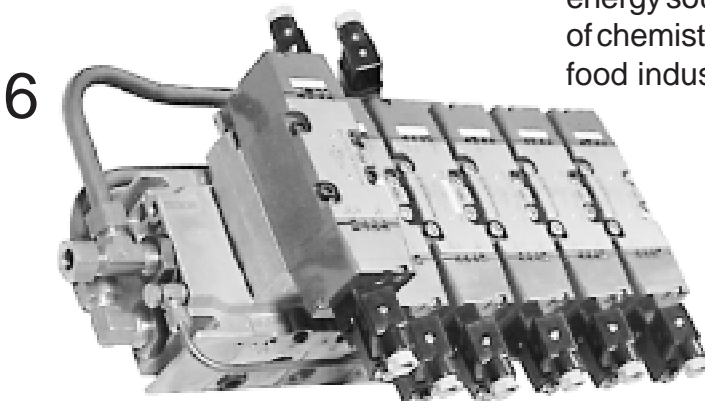

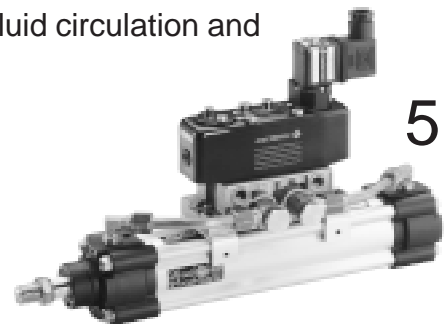

EFFICIENT TECHNICAL MEANS

The SYSTEMS AND AUTOMATION DIVISION has powerful research and production resources at its disposal to propose the most reliable installation with quick response. Plans are laid out by Computer Aided Design (CAD) software. All our equipments undergo simulator tests.

PRODUCT SUPPORT DIVISION

WELL-KNOWN REFERENCES in many application fields :

energy sources, pharmaceutical instead of chemistry, nuclear power, packaging, food industry, automobile industry

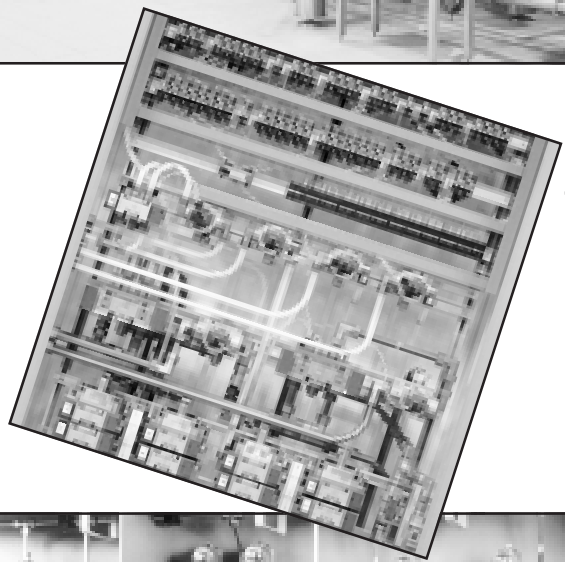

1

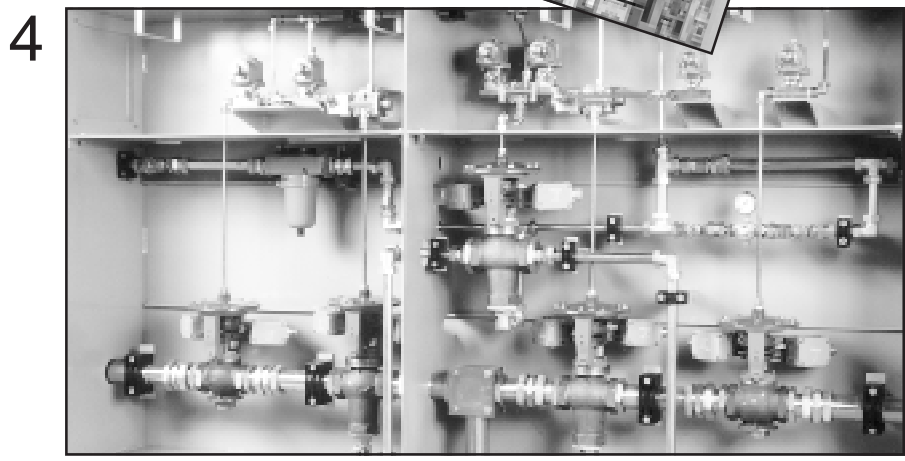

- 1 Solenoid-air control panel for air-operated valves on dechlorination filters
- 2 Power panel for dairy industry.
- 3 Power and logic panel for automobile industry
- 4 Panel in sheet steel, 10 mm thick, with pneumatic wiring integrated in hardened steel tubes and with safety partitioning for nuclear plant
- 5 Valve on cylinder - wiring in copper or plastic tubes
- 6 Pre-wired valve assemblies
